

Follow these steps to ensure the best video playback of your experience

With this software, you will be able to:

- View your in car filming footage
- Edit and record your video to MP4 format
- Play your experience on other devices

Installing the software

1. Insert your SD CARD into your PC or Mac
(you may have downloaded this software and will find it in your download folder)
2. Locate the folder called "Video Player Installers" and install the VLC Player that matches your device by "double clicking" on the installer "PC" or "APPLE MAC"
3. You may be prompted "Do you wish this app to make changes on this device" please click "YES" now follow the on screen instructions until setup completes
4. You may be asked if you wish to update your software click "OK" or "YES"

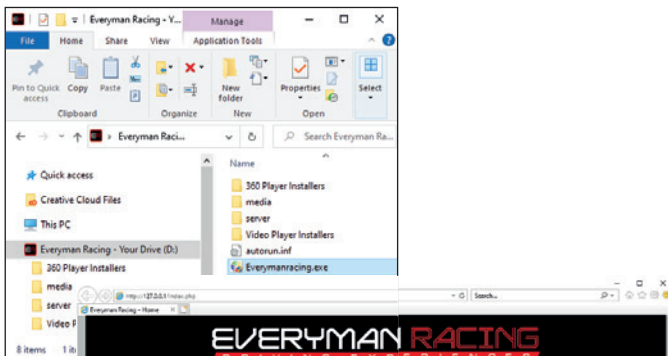

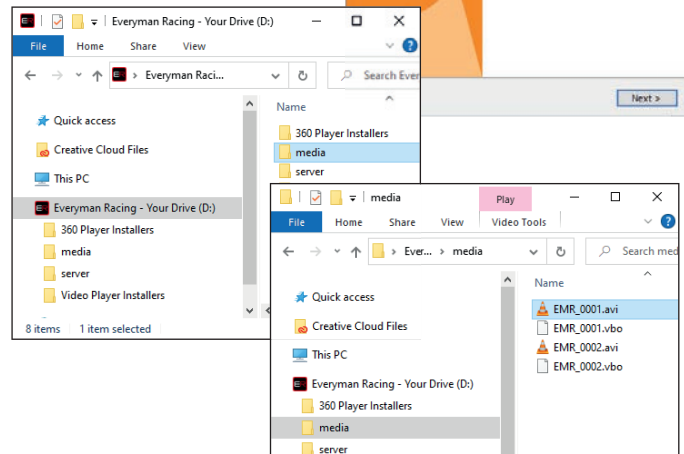

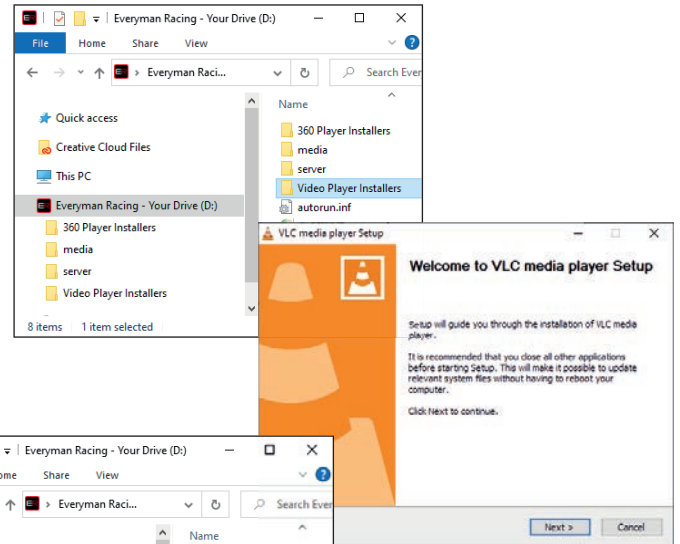

Viewing your In-Car Footage

Method one (on Windows PC or Apple Mac):

1. Insert your SD CARD and in the explorer window that appears locate a folder called "media" double click on that folder.
2. This will open the "media" folder and list your videos;
SD Card > media > EMR_0001.avi
In the case of more than one drive you may have multiple files
(Please ignore the files ending in .vbo these are information files only)
3. Double click on any of the "EMR_0001.avi" files to play your video/s
4. VLC Player may repair your video before playing this is normal

Method two (on Windows PC only):

1. Insert your SD CARD and in the explorer window that appears double click on EverymanRacing.exe and click allow if prompted

Follow these steps to ensure the best 360 video playback experience

With our software, you will be able to:

- View your 360 in car video - Edit and record your video to MP4 format - Play your experience on other devices

Installing the software

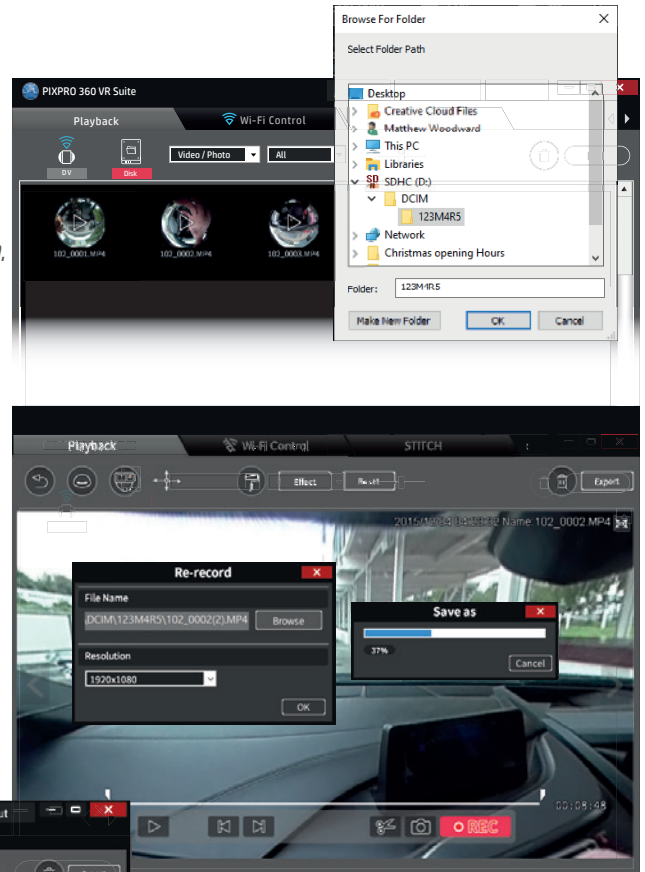

1. Insert your SD CARD into your PC or Mac (you may have downloaded this software and will find it in your download folder)
2. Select the PixPro VR Suite Software and install the app that matches your device "PC" or "MAC"
3. Follow the on screen instructions until setup completes

Viewing your 360 footage

1. Load the software and double click on the "DISK" option located top left of the screen.
2. This will open an explorer window to find your video. This is usually; SD Card > DCIM > 123M4R5 (this last folder will be different for every person)
3. Click "OK" your video/s will appear "DOUBLE CLICK" on the file you wish to play
4. If your video happens to be upside down, use the "VIEW MODE" options on the left to rotate the video.

View your experience on other devices

1. Load the video onto your PC/MAC, and press "RECORD" on the software
 2. Choose your location, filename & resolution click "OK" to save the MP4
 3. Your video will now begin to record
 4. You can move the video around using your mouse while in record mode. (Your movements will be recorded in real time onto the MP4 file).
 5. Once finished simply click the "STOP" button
 6. Wait for the software to save the finished video file and click "FINISH" once complete.
- You can view your MP4 using Windows Media Player or VLC (or any equivalent)
 - Alternatively you save this video file on any media (USB, CD, DVD)
 - To play on certain devices extra steps maybe required.
